

Wallet Packaging

Wallet with self adhesive foil for clinical trials

- Suitable for steriles, solids or liquids.
- Structural packaging design developed by Rondo's packaging experts for your specific product.
- Wallet design and position of the self adhesive foil are synchronized to the specific dosage form.
- Clinical trial information printed direct at the wallet or an added multipage label.
- Wallet production at Rondo in a cGMP environment.
- Manual or semi manual packaging process.

Benefits

- Economic and safe solution for small or mid-sized clinical trial batches.
- No investment in hotseal tools necessary.
- No use of heat during the packaging process ▶ no risk for temperature sensitive products.
